## WORK EXPERIENCE

**Coates Group | 2021 - present**

**Frontend Engineer**

- Worked in CI/CD Agile environment with React, Redux, Sass, JavaScript and TypeScript
- Planned and built features from ideation to final product using tools such as Redux, React hooks, functional components and styled components
- Authored clear and concise documentation to ship with features
- Engineered data from API to display dynamic content according to current weather conditions
- Conducted weekly 1 on 1 knowledge share sessions with junior developers
- Trained new team members on JavaScript and SASS best practices, and common debugging processes
- Collaborated with design, content management, and quality assurance team to prototype and deliver time-sensitive projects for McDonald's Canada

**Coates Group | 2020 - 2021**

**Junior Frontend Developer**

- Worked with object oriented and functional programming paradigm
- Fetched data from internal database and manipulated with JavaScript and React
- Developed reusable components with Sass and React to map out dynamic content
- Solved compatibility issues caused by older browser versions
- Used Redux state management for displaying dynamic content on menu boards
- Teamed up with other devs, design, CMS, and QA teams in an Agile environment

**Che Patisserie | [www.chepatisserie.com](http://www.chepatisserie.com) | 2021**

**Freelance Developer**

- e-Commerce website designed and developed for small bakery selling weekly products
- Followed mobile-first best practices to align with the usage patterns of majority end-users
- Pulled data from Google Sheets to simplify content management for non-technical client
- Leveraged EmailJS to send automated confirmation/invoice emails to customers
- Integrated Discord webhooks to send notifications to business owner when an order is submitted
